DETAILED ACTION

1. An After-Final Amendment was filed 2/25/06, and will be entered into the application. Claims 21-34 were cancelled, and Claims 35-46 added.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Kohata et al 5511630.

Kohata discloses a hydraulic power steering apparatus comprising

Valve V1 to be actuated/rotated on an applied torque (via steering wheel 3) for altering a pressure of fluid to be received by the power steering system (fig 1), and is further actuated by electromechanical displacement via motor 18,

The valve including first 25, and second 28, members, which rotate, and are axially-displaced, with respect to each other,

Wherein the second member is actuated further by motor/control mechanism 18, depending on external vehicle input parameters via sensors 14-17 (c3, first paragraph), and,

The motor actuating toothed member/guide portion 32, arranged on the second member, to engage cog/wheel 33, this wheel 33 being stationarily located relative to the valve,

The second member thus being rotatably displaced with respect to shaft 23 (c4, ln 24-29).

Art Unit: 3611

3. RESPONSE TO REMARKS

Upon reconsideration, Examiner provides rejections for all new Claims in which Kohata discloses all recited elements. *She sincerely apologizes for the inconvenience.*
